Nuvio logo usage

One page for anyone placing the logo: README, HACS, docs, the dashboard, slides, print.

1 · THE LOGO

A lowercase n drawn as an arched doorway with the door inside: shelter, home, quiet order. On dark backgrounds the door lights up lime, a light left on.

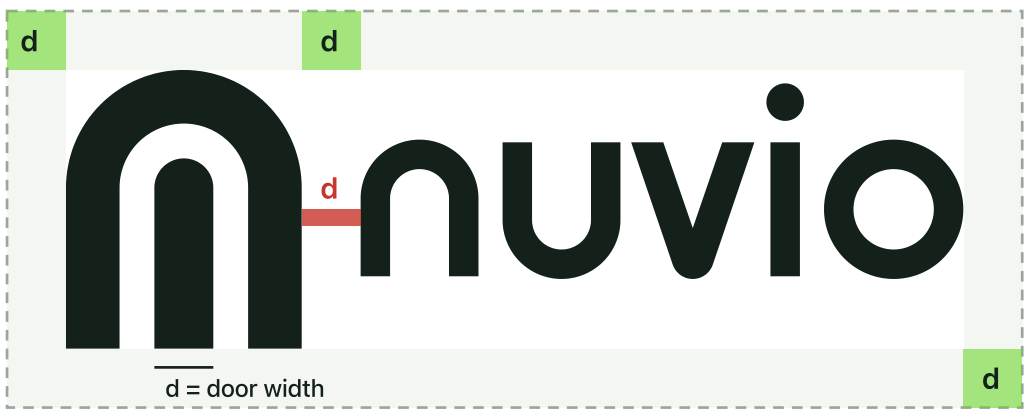

Horizontal (primary)

Horizontal on dark: lit door

Stacked

Symbol only · wordmark only also supplied

2 · CLEAR SPACE AND PROPORTIONS

d = the width of the door (one quarter of the symbol's width). Keep **1 d** clear on every side of every version. Horizontal: symbol to wordmark gap = 1 d. Stacked: symbol base to i-dot = 1 d. Wordmark x-height = 0.48 × symbol height. Use the supplied lockups; never rebuild them.

3 · MINIMUM SIZE AND THE SMALL CUT

VERSION	SCREEN	PRINT
Horizontal	96 px wide	25 mm wide
Stacked	64 px wide	18 mm wide
Wordmark only	64 px wide	15 mm wide
Symbol (master)	48 px and up	12 mm and up
Symbol, small cut	20 to 47 px	5 to 12 mm
Favicon grid file	exactly 16 / 32 / 48 px	n/a

master 48 · small 28 · grid 32 · grid 16

Below 48 px switch to the **small cut** (heavier frame, lower door) so it never reads as an "m". At exactly 16/32/48 px use the pixel-grid favicon.

CMYK/Pantone are conversions: proof against a Pantone bridge guide before print.

Why ink + lime: pure lime is energetic, not calm, so the logo is quiet deep ink and lime only appears as the light in the door (on dark) and as the product accent. #63D71E is unchanged, matching the dashboard's default accent.
